SUMMARY

Software Engineer with strong experience in full-stack development, cloud deployments, and modern software engineering practices. Skilled in building scalable web applications using JavaScript ecosystems (React, Node.js), cloud infrastructure, and automation workflows. Experienced with Linux environments, CI/CD pipelines, containerized applications, and AI integrations. Passionate about solving real-world problems through efficient system design, infrastructure automation, and reliable software delivery.

EXPERIENCE

Software Engineer (Full Stack Developer)
IT Vision Inc., Lahore October 2024 – March 2025

- Developed scalable full-stack web applications using React.js and Node.js.
- Designed RESTful APIs and integrated frontend applications with backend services.
- Managed deployment workflows including domain configuration, DNS setup, and hosting environments.
- Collaborated with development teams to optimize application performance and scalability.

Software Engineer
Yaksol April 2025 – September 2025

- Contributed to backend and frontend application development within Linux-based environments.
- Worked with Git and GitHub for version control and collaborative development.
- Assisted in deployment workflows, testing, and debugging production issues.
- Collaborated with cross-functional teams to improve system reliability and performance.

Freelance Software Engineer
Fiverr Inc. October 2025 – Present

- Delivered full-stack web applications and cloud-based systems for international clients.
- Built scalable backend APIs and responsive frontend applications using modern JavaScript frameworks.
- Deployed production applications with domain configuration, cloud hosting, and email services.
- Implemented automation workflows and integrated AI APIs for intelligent software systems.

PROJECTS

Production Business Websites Deployment

- Developed and deployed full-stack websites using React.js (Vite) and Node.js backend.
- Managed domain setup, hosting configuration, DNS management, and deployment pipelines.
- Integrated Zoho Mail professional email services with domain authentication.
- Implemented WhatsApp contact integrations for customer communication.
- Live production websites include:
  - eidizada.co.uk
  - janbalwholesale.co.uk
  - oviyatech.co.uk

AWS Cloud Deployment & CI/CD Pipeline

- Deployed a full-stack application on AWS using EC2, IAM, and S3.
- Configured CI/CD pipelines using GitHub Actions for automated build, test, and deployment.
- Implemented Linux server setup, security groups, and monitoring configurations.
- Used Docker containers to ensure consistent deployments across environments.

Infrastructure Automation with Terraform & Ansible

- Created Infrastructure as Code (IaC) scripts using Terraform for automated AWS provisioning.
- Automated server setup and application configuration using Ansible playbooks.
- Reduced manual deployment errors and improved system consistency.

AI Automation System with Python
- Developed an AI-powered automation system integrating ChatGPT APIs using Python.
- Implemented thread scheduling and asynchronous task execution for efficient request processing.
- Built automated workflows that process user input and generate AI-powered responses.

Containerized Microservices Monitoring with Docker & Kubernetes
- Containerized microservices using Docker and deployed them using Kubernetes.
- Configured Kubernetes pods, services, and scaling policies.
- Implemented monitoring using logs and performance metrics.

Extend My Pay
- Implemented Stripe recurring payment system using cloud functions.
- Built web-based admin dashboard to review and manage user submissions.
- Managed categorized locations including service providers and compliance checks.

Speech Therapy World
- Developed bilingual application with real-time content management.
- Implemented role-based access for admin, parent, and child modules.

AI English Speaking Application
- Built an AI-powered speaking assistant using speech recognition and real-time feedback.
- Integrated Azure Speech APIs and OpenAI API for intelligent conversations.
- Implemented backend automation using Firebase Cloud Functions.
- Integrated Stripe subscription payments and deployed on Google Play and Apple App Store.

Emergency Vehicle Tracker Application
- Developed real-time tracking system using Flutter frontend and backend APIs.
- Integrated Google Maps for live tracking and route visualization.
- Implemented push notifications and monitoring logic for emergency response.

EDUCATION

BS Software Engineering
University of Gujrat — Oct 2020 – Aug 2024
Gujrat — CGPA: 2.92

SKILLS

Operating Systems:	Linux (Ubuntu), Command Line Administration
Cloud Platforms:	AWS (EC2, S3, IAM), Azure (basic)
DevOps Tools:	Docker, Kubernetes (basic), Terraform, Ansible
CI/CD & Version Control:	Git, GitHub Actions, CI/CD pipelines
Programming Languages:	JavaScript, Python, Bash (basic)
Frontend Development:	React.js, Vite, HTML, CSS
Backend Development:	Node.js, RESTful APIs, Firebase Cloud Functions
Databases:	MySQL, PostgreSQL, Firebase Firestore
AI Integration:	OpenAI API, ChatGPT integration, automation workflows
Monitoring & Debugging:	Log analysis, application monitoring
Tools:	VS Code, GitHub, Postman, Docker CLI
Deployment:	Domain configuration, DNS management, cloud hosting
